BookSharp

For B-book and hybrid brokers on MT5

Find the accounts that drain your B-book. Know your risk before it hits.

A handful of accounts take money out of your book through patterns that look legitimate. We find them on your own data, price each one in dollars, and hand your dealer one action that stops it.

- Reopening arbitrage
- Stale price after a market reopen
- Reward and rebate farming
- All-in before news
- Coordinated hedge groups
- Swap-free abuse

1

Free Leak Audit in 72 hours

Your dealer exports 60–90 days of deals and balance operations: about 30 minutes, logins only, under NDA. You get the dollars lost per month by pattern, and three full case files with the evidence and the action for each.

2

Radar + risk view

Read-only and IP-locked. Each case reaches your dealer with its evidence and one action from your Rulebook. Your exposure is tracked live against the limits you set, with a costed hedge proposal on any breach.

3

Monthly statement

We confirm in the data that each action was taken, and report the leak stopped, the leak you chose to keep, and the fee.

Platform + 5% of what's stopped

$2,500 a month for the platform, plus 5% of the leak verifiably stopped, capped at $5,000 in total. The 5% counts only cases you act on, for three months each. Hedge proposals are never charged.

LEAK STOPPED / MONTH	$10,000	$25,000	$50,000	$100,000
Our fee	$3,000	$3,750	$5,000	$5,000
You keep	$7,000	$21,250	$45,000	$95,000

NEVER ASKED FOR

Client names, emails, IPs, KYC or payment data, admin rights, or control of your book.

OUR PROMISE

If the audit shows less than $5,000 a month of stoppable leak, we tell you not to sign.

FOUNDING BROKERS

First 6 brokers: a $1,500 platform fee for the first 12 months, for an anonymised case study.
